

COVID-19

What is it?

Coronavirus (COVID-19) is a new illness that can affect your lungs and airways. It's caused by a type of coronavirus. There are simple steps you can take to protect you and your family.

How is it spread?

Higher risk people...

- ★ Older adults (60 years +)
- ★ Young children & babies
- ★ People who have a serious underlying medical condition, such as heart disease, diabetes, or lung disease.

From the evidence so far, the COVID-19 can be transmitted in ALL AREAS (including areas with hot and humid weather) as well as to ALL PEOPLE. Some people or places may be at higher risk but no one is immune. (WHO)

Watch for symptoms...

The symptoms can be mild, or in some cases severe enough to require hospitalization. Symptoms of the COVID19 illness primarily include the following:

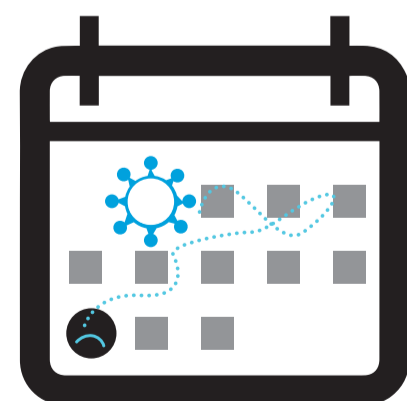

← **COUGHING**

SHORTNESS OF BREATH →

← **FEVER**

SYMPTOMS MAY APPEAR 2-14 DAYS AFTER EXPOSURE
