1. Print the file out. It will need 6 A4 papers. (using paper over 150gsm is recommended.)
2. Trim the pages. You'll get total 10 pages and 1 part for p.15&16.
3. Fold in half, print facing inward and arrange pages in the correct order.
Glue together using a glue stick
4. Fold the cover and glue to the book.
(Do not glue the spine, this allows the book to be flexible.)
5. cut out the face masks and glue it on p.15&16. The book is done!

*Detail steps could be found on my FB: miiiamia

Sick people have germs in their bodies that we can't see.

! A ~ choo! /

Germs shoot out with a sneeze!

1

2

Once germs are out, they can enter the body of a healthy person from the nose and mouth.

3

4

Then healthy people get sick too, and may have a fever.

5

May have a runny nose, cough, and feel very ill.

6

Take bitter medicine.

Can't go out to play. Feel sick. Can only lay in bed and rest.

Get a shot!

Germs like to see children get sick!

7

8

Then how do you protect
the nose and mouth to
stop germs from getting in?

is this OK?

Ta-da!
「Little Mask Guard」
comes out to help!

Little mask guard needs your ears to help!

13

This will protect the nose and mouth and keep germs from entering!

14

Little mask guards can block outside germs.

15

If you are sick, little mask guards can also block the germs in your body and keep them from getting other people sick.

16

Together with little mask guards we can fight germs!

P.15+16 mask guard pattern

Carefully cut out the face masks. Fold and glue the masks together.

Glue the tabs to the area indicated by "A" and "B".

Before the glue sets, adjust the mask as needed. The mask should cover both faces
